

# Industrial Wet Vacuum Cleaners and Coolant Recycling and Filtration Machines

## Freddy KSV45

The smallest Freddy vacuum, designed to remove coolant, swarf, and oil from machine tools.

## Freddy SuperMinor

Coolant recycling vacuum, designed to remove coolant, swarf and oil from machine tools, with 100 litre capacity.

## Freddy Midi

Vacuum designed to offer the same performance as the SuperMinor but with a larger capacity of 200 litres.

## Freddy Ecovac

Coolant recycling vacuum with the same performance as the Midi, but with continuous suction and return.

## Freddy Mark V

With the same features as the Freddy Ecovac, the Mark V is the largest of the portable coolant recycling and filtration machines.

## Freddy Mark V Battery Operated

Our battery operated Mark V has all the features of the standard Mark V but is battery operated.

## Freddy Tramp Oil Separator

Designed to remove tramp oil (free lubricating and hydraulic oil) from coolants and return for re use.

## Freddy Centrifuge

The Freddy Centrifuge offers the alternative to paper band filtering, suitable for a wide range of cutting oils and coolants.
